## Kinder Newsletter

"Is It Alive?"

Projects Conclusion

We are working on our final projects! Some of you have come to work with your child creating the life cycle of a living thing with recyclable materials. For those who have not had the opportunity to come yet, next week (Monday Dec. 07- Thurs. Dec. 10) is the last week for these projects. The following week (Monday Dec.14- Friday Dec.18) is last week of school and it is going to be a week full of interesting activities for our theme conclusion.

One of these activities is that we will prepare a museum with the projects made and you are invited to come on **Thursday December 17<sup>th</sup>** at any time you want, because on that day we will be presenting our projects to the whole school. The other activity is that we are having a field trip to the zoo. I will inform you all the details in the communication notebook.

Do not miss this great opportunity to share with your child at school!

Important Note:

Friday December 11 is the day for parent-teacher conferences. Make sure you have made an appointment with Gina.
