

Kinder Newsletter

December 2009

Review

Time is flying by. You can see how time made our plants grows. It was very interesting. We are still working on the theme "Is it alive?" We still have lots to experiment.

This past month worked with the words **like, to, see, down, fun, up, what** and **play**, and the next weeks we will work with **look, little, jump,** and **have**. Help us to reinforce these words when reading books at home.

Writing tip of the month

If your child reads good books, (s)he will be a better writer.

Looking forward

We will continue working on "Is it alive?". We are planning a field trip in a few weeks. We will let you know when the date is closer.

Now we are just waiting for our chickens to hatch eggs. We are feeling a little like hens. We are watching the temperature, humidity and position of the eggs.

Important days coming:

- *Parents/teachers conferences. Dec. 11
- *Last day of class. Dec. 18

• **Activity:** Kinder A and B are hatching chicken eggs during 21 days.

• **Check this!** Resource that we have been using these weeks in the computer center.
