

PRE-K News

December 2009. Santo Domingo

Important dates

-December 11 -parent/teacher conferences

-December 18- last day of school before vacation begins

Colors all around!

After solid work in eating and Growing, learning about food and the role it plays in our development, we now come to our last theme of 2009, *COLORS ALL AROUND*.

This is our new and interesting topic! Children will be learning about colors and fantastic combinations. This interactive theme integrates mathematics with combining colors and shapes, writing with drawing and using details in our projects and folders, and reading. We will be reading about the role of the colors as they are all around us.

Reminder:

- Remember that all children's work are published in the classroom and you can visit whenever you want .
- The pictures of our field trip to BG town are posted in our web site.
